## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, 25 and 26, drawn to a non-naturally occurring bifunctional inhibitor molecule that prevents binding between a target protein and a binding protein, classified in class 530, subclass 350.
  - II. Claims 8-15, drawn to a synthetic bifunctional inhibitor molecular formula, and its function in vivo, classified in class 424, subclass 1.53.
  - III. Claims 16-24, drawn to a method for inhibiting binding between a target protein and a binding protein, classified in class 424, subclass 9.1.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, group I is drawn to a non-naturally occurring bifunctional inhibitor molecule and optionally uses a linker, Group II is the formula of the inhibitor which requires a linker.
3. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the

Art Unit: 1641

process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with another materially different process such as using a compound for denaturing the target protein receptor sites.

This relationship is applicable to group II and III.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. A telephone call was made to Mr. Bret Field on March 01 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.
